Agent 2.0 is the top-rated Usenet newsreader on the Internet. Agent is also an excellent POP email client.

This high level of integration between Usenet news and POP email separates Agent from all other communication products. Whether you are downloading yEnc binaries or responding to email, Agent provides you with all the right features.

Agent is also the most mature newsreader on the market. Since the introduction of "Agent .99" in 1994, Agent has always maintained the highest possible ratings from the most trusted sites for Internet software.
